

Are You Having Trouble Paying for Medicine?

Community Health Network is here to help

**Medication Costs can be worrying.
Here are some ways we can help.**

- ✓ Community Health Network has a Medication Assistance Coordinator who will identify how you may be able to obtain the medications you need for less cost.
- ✓ The Medication Assistance Coordinator will find out if you qualify to get free brand name medications from drug companies. If so, the Coordinator work with you and your health care provider to apply.
- ✓ You may also be referred to low cost medication programs or be given drug coupons that allow you to get your medicine for a discount.
- ✓ The Medication Assistance Coordinator may also suggest a change to the medication regimen, such as switching to a generic medication or switching to a brand name medication that has a patient assistance program for which you qualify.

Contact our Medication Assistance Coordinator to get help today!
