### **Community Howard Regional Health Implementation Strategy**

2025-2027

This document describes how Community Howard Regional Health (CHRH or the hospital) plans to address the needs identified in the Community Health Needs Assessment (CHNA) published by the hospital on December 18, 2024. The CHNA report can be found at:

### CHRH CHNA Report 2024.pdf

The Implementation Strategy describes how the hospital plans to address significant needs throughout the calendar years 2025 through 2027.

The Implementation Strategy for Community Howard Regional Health has been prepared to comply with federal tax law requirements set forth in Internal Revenue Code Section 501(r) requiring hospital facilities owned and operated by an organization described in Code Section 501(c)(3) to conduct a CHNA every three years. Secondly, it will adopt an Implementation Strategy to meet the community health needs identified through the Community Health Needs Assessment reports for each hospital facility. The Implementation Strategy will satisfy each of the applicable requirements.

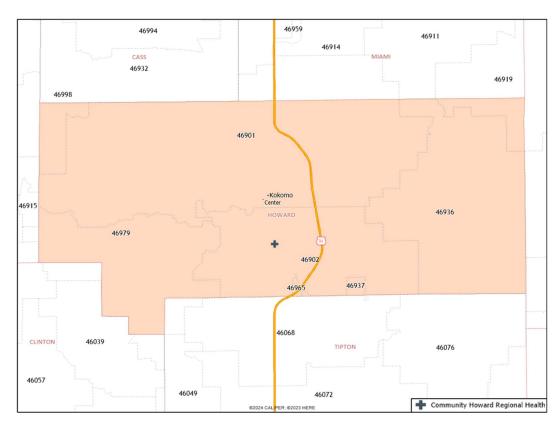

Community Howard Regional Health reserves the right to amend this implementation strategy as circumstances warrant. Certain community health needs may warrant increased focus and resources during the next three years. Moreover, other organizations may decide to increase resources devoted to addressing one or more of the significant community health needs, or grant funds that support described initiatives may become unavailable, and as a result, the hospital may amend its strategies and focus on other identified needs.

### **About Community Howard Regional Health and the Community it Serves**

Community Howard Regional Health (CHRH) is a full-service hospital in Kokomo, Indiana. The hospital campus offers primary and specialty inpatient and outpatient services, which include a heart program, behavioral health, oncology, orthopedics, emergency care, surgery, wound care, obstetrics, and gynecology.

Community Howard Regional Health is part of Community Health Network, an integrated health delivery system based in Indianapolis. As a non-profit health system with more than 200 sites of care and affiliates throughout Central Indiana, Community Health Network's full continuum of care integrates hundreds of physicians, eight specialty and acute care hospitals, surgery centers, home care services, MedChecks, behavioral health, and employer health services.

For purposes of this CHNA, CHRH's community was defined as Howard County, Indiana. The community was defined by considering the geographic origins of the hospital's inpatient discharges and emergency room visits in calendar year 2023. Howard County accounted for 73 percent of the hospital's inpatient discharges and 80 percent of its emergency department visits.

Summary information regarding the Community Howard Regional Health community:

- Total population of Howard County was approximately 83,574 persons.
- Approximately 12% of residents in the community served by CHRH live in poverty.

### **Selection on Significant Health Needs to Addressed**

The hospital reviewed the CHNA findings and applied the following criteria to determine the most appropriate needs for the Community Howard Regional Health community.

- The extent to which the hospital has resources and competencies to address the need
- The impact that the hospital could have on the need (i.e., the number of lives the hospital can impact)
- The frequency with which stakeholders identified the need as a significant priority
- The extent of community support for the hospital to address the issue and potential for partnerships to address the issue

By applying these criteria, the hospital determined that it will address the significant health needs identified by Y (for Yes) in the table that follows. Issues identified by N (for No) represent issues that the hospital does not plan to address during the 2025-2027 period.

Significant Health Needs Identified in the 2024	Intend to Address
CHNA	(Y/N)
Access to Care	Υ
Mental Health & Access to Mental Health Services	Υ
Substance Use & Overdose	Υ
Aging Population and Elderly Needs	Υ
Maternal & Child Health and Wellbeing	Υ
Food Access and Nutrition	N
Obesity, Healthy Lifestyles and Assoc Conditions	Υ

While Community Howard Community Health does not plan to specifically address Food Access and Nutrition in the 2025-27 implementation plan, they are actively addressing these needs through partnerships with local organizations addressing food insecurity and nutrition. These partnerships include in-kind support such as volunteers and donations as well as through grant opportunities through our Community Collaboration for Health Equity grant program. In addition, CHRH will actively engage with the Howard County Food Access Alliance.

Members of the Leadership Team at CHRH along with Leadership throughout Community Health Network met to review the findings of the CHNA and concluded that the hospital's implementations strategy for 2025-2027 should focus on the key areas and strategies described below. The strategies listed below are not inclusive of all hospital and Network activities that impact the needs identified.

## **Significant Health Need: ACCESS TO CARE**

Focus Area	Program/Service	Strategy	Anticipated Impact
Workforce	Behavioral	Continue to provide the	60+ dually licensed eligible

Chronic Disease Management	Faith Health Initiative	Among the faith community nurses supported by Faith Health Initiative, increase the percentage who offer blood pressure awareness screening events and hypertension prevention and management education in their faith communities from 10% to 25%	Increase the incidence of early detection of hypertension and improve blood pressure control among those already diagnosed.
Prevention	Disease Prevention and Health Outcomes Council	Implement quarterly (REaL) data reviews with the CHNw Disease Prevention and Health Outcomes Council on key network priorities including breast cancer screening, diabetes, and advance care planning.	Determine strategies for addressing screening gap and health outcomes disparities among various populations
Health Equity	Central Indiana Health Equity Collaborative	Continue collaboration with the Central Indiana Alliance for Health Equity which includes Community Health Network, Eskenazi Health, Franciscan Health and Indiana University Health in partnership with the Indianapolis Recorder and Greater Indianapolis Branch of the NAACP.	Develop community wide cardiovascular/hypertension program to increase awareness of blood pressure control for adults and/or increase in # of people engaged around their blood pressure health
Education and Prevention	Partnership with the Kokomo YMCA	Provide monthly educational content and speakers regarding key health topics like chronic disease management, heart health and disease prevention	Improved understanding of disease prevention and management.

## Significant Health Need: AGING POPULATION and ELDERLY NEEDS

Focus Area	Program/Service	Strategy	Anticipated Impact
Access	Community ProCare @ Home	Community ProCare at Home is a house-call care service for patients who are unable to leave their home for care, are recovering from a recent hospital stay, or may have worsened symptoms of a chronic illness.	Improved health outcomes for patients served in the program. Increase new patient growth by 5% annually.
Geriatric Care	HELP	Plan and implement expansion of the HELP program to CHRH. This program identifies independent seniors at the beginning of their inpatient stay and engages a specialized team to ensure they maintain their independence and mental clarity throughout the duration of their hospital stay.	Reduction of patients experiencing delirium while inpatient, improving patient experience and outcomes. Maintain less than 5% of all enrolled patients will experience delirium during their admission.
